EXTENSIVE SUMMARY

Method
The purpose of this research Hacı Bektas Veli Nevşehir University aims to analyze the social network usage level of the students at the site. Research was conducted in the province of Nevşehir. The sample audience research Nevşehir Hacı Bektaş Veli University, Faculty of Education, Faculty of Arts and Sciences, Faculty of Fine Arts, Faculty of Economics and Administrative Sciences, Faculty of Theology, Architecture Faculty of Engineering and Faculty of Tourism is limited to students. This study is limited to the 2014-2015 academic year spring semester. To measure the state to use social networking sites surveyed 203 university students 'Social Networking Sites Use Survey' it was applied.

Result and Evaluation
Research on college students' social networking site for members that status, the duration of their membership to social networking sites, social networking number they use as an active, average time spent a day on social networking sites were studied to determine the purpose of using social networks. According to the survey; It was determined that the majority of college students use social networks 1-3 hours a day. Leading social Networks use dare Facebook and Twitter. Given the purpose of social networking messaging, add your own photo, online chatting, welcome to the videos on the internet, share photo sand anecdotes, it has been seen that. Internet and social networks in particular have been found to make their home sand input from school.

It seems that with there centproliferation of media that can be entered in to the Internet, students spend most of their free time on the internet and social networking. This situation will adversely affect social activities such as young people's physical and mental development of young people is also envisaged to reduce.
